

The Beast

**Powerful
self-service
technology built
for demanding
environments.**

Built to handle demanding self-service

The Beast combines robust hardware, dual-display technology and responsive touchscreen functionality within a substantial, high-impact terminal.

Designed to support a wide range of self-service applications, it provides the processing power and flexibility needed to create intuitive customer journeys, streamline transactions and deliver reliable performance in demanding customer-facing environments.

Dual-display experience

Two 19-inch displays provide a versatile interface for presenting information, guiding interactions and supporting engaging self-service experiences.

Flexible payment possibilities

The terminal can be configured to support different payment requirements, creating a versatile platform for transactional self-service.

Responsive touchscreen

Projective capacitive touchscreen technology delivers quick, accurate interaction for a smooth and intuitive customer journey.

Built around your application

Flexible hardware and software options allow The Beast to be configured around different customer journeys, operational requirements and use cases.

Designed for demanding environments

A robust freestanding design provides a dependable self-service platform suited to busy locations.

Reliable internal performance

Intel processing power, solid-state storage and commercial-grade components provide a dependable foundation for consistent everyday operation.

Keep customer journeys moving

Intuitive self-service functionality allows customers to complete routine interactions independently, reducing pressure on staff.

Customized to your brand

Exterior graphics and vinyl branding can be tailored around your business, helping The Beast integrate seamlessly into its intended environment.
